Empathy Map

Date:	21 October 2026	**Team ID:**	Piyush-Balodiya-GenAI-2026
Project Name:	Multimodal Construction Intelligence Platform (CONSTRUCTAI)	**Maximum Marks:**	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives — what they Say, Think, Do, and Feel — in relation to the problem your project addresses. This helps the team build a customer-centric solution.

TARGET PERSONA: Rajesh Verma | ROLE: Senior Construction Site Manager & Lead Safety Auditor

SAYS (User Verbal Expressions)

- *"I cannot be physically present at all crane loading towers and basement pits at the same time."*
- *"Workers routinely remove helmets and vests in humid conditions when supervisors walk away."*
- *"Identifying whether a hairline crack is cosmetic shrinkage or structural shear takes too long with physical gauges."*
- *"Material takeoff calculations and monsoon rain disruptions cost us lakhs every quarter."*

THINKS (Beliefs & Concerns)

- *"If a fatal safety hazard occurs on site, our company faces immediate criminal liability and blacklisting."*
- *"Visual AI should automatically flag missing helmets and vests from CCTV snapshots in real-time."*
- *"IS 456 compliance reports should be auto-generated instantly with chemical retrofit repair recommendations."*
- *"I need one unified dashboard rather than managing 5 separate WhatsApp groups and spreadsheets."*

DOES (Daily Routine & Actions)

- Conducts 3 to 4 strenuous manual site inspections daily across multi-acre active construction zones.
- Captures photographs of structural cracks and surface defects with a mobile camera for off-site civil consultants.
- Manually checks weather radar and wind speeds before critical concrete pouring and tower crane operations.
- Prepares tedious manual EHS compliance logs and BOQ material reconciliations late into the night.

FEELS (Emotions & Sensations)

- **Anxious:** Constant underlying fear of fatal worker falls, scaffolding collapse, or sudden safety audits.
- **Frustrated:** Burdened by repetitive manual reporting, paperwork, and fragmented communication channels.
- **Vulnerable:** Apprehensive that subtle structural cracks might escalate into catastrophic structural failures.
- **Optimistic:** Highly eager to empower the site team with instant multimodal AI-powered vision tools.
